Manufacturers of Precast & Wood Products

TraverStone Sealer

**HearthCo Inc. has experienced satisfactory results with
Jasco Gloss Wet Look Cure Seal to protect the TraverStone finish.**

Always test on a scrap piece of TraverStone product to ensure desired finish is acceptable. Two coats are recommended for best results.

HearthCo Inc. accepts no responsibility for the performance of
Jasco Gloss Wet Look Cure Seal.

Jasco is a Homax Product
www.homaxproducts.com

Beautifies and protects from oil, rust, water stains, and food and juice stains. Can be applied to old or new concrete, brick, exposed aggregate, terrazzo, flagstone, quarry tile, patios, driveways, walkways, stepping stones, carports, & garage floors. Wet Look Cure-Seal slightly darkens surfaces, giving a clean natural "wet-look" that will not yellow. Its tough, abrasion resistant, non-flammable and low odor properties make it easy to use and maintain. Also used as curing agent for fresh concrete. Eliminates spalling (freeze-thaw), concrete dusting and reduces efflorescence (chalky discoloration). Resists hot tire pick-up, road salt damage and stains.

- For interior or exterior use
- Beautifies and protects
- Gives a clean natural "wet-look" that will not yellow
- Tough, abrasion resistant, non-flammable and low odor
